Oregan Networks is a global software and services company, providing a lightweight embedded middleware platform for delivery of multi-network Digital TV services to hybrid broadcast receivers and Connected TVs.

The company's unparalleled expertise spanning all contributing technologies of the digital content delivery value chain, has enabled it to lead and expedite complex multi-vendor PayTV deployments for the world's largest telecom and broadcast operators.

Oregan's platform encapsulates a comprehensive CPE software architecture blueprint, combining open standards with carrier-grade networking, security, quality of service and monitoring modules.

Company Profile

Product and Markets

Oregan supplies flexible middleware and remote CPE management solutions to satellite, cable and telecom service operators, compatible with multiple Conditional Access Systems and portable across any number of hardware variants.

The complete media client solution is offered to multi-regional network operators, who are investing into highly differentiated, bespoke broadcast and IP services across multiple screens, as well as unifying the service offering across geographic markets.

The company specialises in solutions for harmonised deployment of next generation IP services to legacy and new platforms, with specialised experience in the needs of the high growth emerging markets, including ASEAN, Latin America and MENA territories.

Oregan Media Browser 5 is a fast-track Set Top Box software solution that incorporates international broadcast and broadband standards for secure delivery of high quality audio-visual entertainment and Internet applications.

Global Value Chain Partnerships for Faster Results

Oregan is vertically integrated into the global content delivery value chain, working with broadcasters, studios, rights management and conditional access companies, as well as cloud based content service providers.

Oregan Networks Ltd

Registered office: The White Building,
52-54 Glenthams Road, London, SW13 9JJ, UK.
phone: +44 20 8846 0990
email: marketing@oregan.net
web: www.oregan.net
Registered in England No.3386529,
VAT Registration No.GB695085495

Reducing the complexity of system design and integration, Oregan offers reference implementations of its middleware in collaboration with leading silicon providers and global device manufacturers. This approach allows faster innovation and roll-out of devices to consumers.

Advanced Research and Development

The latest release of Oregan's solution builds on its strong track record in design and innovation, in line with the key emerging trends for PayTV service delivery and management practices. Oregan Media Browser 5 incorporates the following capabilities:

- High performance HTML5 and WebGL 3D engine for user interface design
- Adaptive bitrate streaming for efficient video delivery
- Content security and hardware tamper resistance
- Broadcast and Multicast Linear IPTV
- Global media search
- TR 069 / 135 remote device management and analytics
- Multi-room distribution of live and recorded media
- Companion screen EPG and PVR applications to facilitate remote recording control, distribution and search
